- Begin to review for job Interview
- test code

2 我是中国人

```
#include <pthread.h>
#include <stdlib.h>
#include <stdio.h>

#define SIZE 8    // Size by SIZE matrices

using namespace std;

int main(int argc, char* argv[]) { // sampel mark for 中文是可以的
    pthread_t* thread; // pointer to a group of threads
    int i;
    if (argc!=2) {
        printf("Usage: %s number_of_threads\n",argv[0]);
        exit(-1);
    }
    num_thrd = atoi(argv[1]);
    printf("num_thrd: %d\n", num_thrd);
    init_matrix(A);
    printf("\n");
    init_matrix(B);
    thread = (pthread_t*) malloc(num_thrd*sizeof(pthread_t));

    for (i = 1; i < num_thrd; i++) {
        //printf("address i: %d\n", i);
        int rc = pthread_create(&thread[i], NULL, multiply, &idx[i]);
        if (rc != 0) {
            perror("Can't create thread");
            free(thread);
            exit(-1);
        }
    }

    // main thread works on slice 0
```

```
// so everybody is busy
// main thread does everything if thread number is specified as 1
//int tmp = 0;
multiply((void*)&(idx[0])));

// main thread waiting for other thread to complete
for (i = 2; i <= num_thrd; i++)
    pthread_join(thread[i-1], NULL);

printf("\n\n");
print_matrix(A);
printf("\n\n\t      * \n");
print_matrix(B);
printf("\n\n\t      = \n");
print_matrix(C);
printf("\n\n");

free(thread);

return 0;
```
