  - So far got four done: **156/169** 
    - sort list
    - merge k sorted list - trapping rain water
    - recovery binary search tree

    - am going to work on the rest 6 tonight, so that hopefully tomorrow I would be able to work on the new 10 questions;
    - word ladder II: spent hours on this one, but got really sick with it! I should have solved my problems gradually, like solve the clone graph to understand graph first before touch this one, but I will get this one done later when I have clear mind.
      - divide two integers
      - clone graph - find peak element

regular expression matching

- 12/23/2014, Tuesday 43

  - Meet IPO staff this morning got coming semester plans clear at 8:30am in the morning;
  - Will most probably meet some friend and have dinner together; changed to be tomorrow noon
  - Hopefully by this morning's dirruption meeting staff, I could change back my regular schedule instead of 5am-13:30 day time sleeping, target for tonight fall asleep before 12:00am; fall asleep from 10:00-15:30, seems I will change my schedule back as expected tonight~!
  - Will not work on Algorithms for today, but work on it hard tomorrow. I have my confidence that I can figure them out, and do great job summarize the questions during my Java round, no worries!

- so far Got 2 done: **158/169** 
  - find peak element
  - maximal rectangle

# 12/24/2014, Wednesday

- $\cdot$  2:00(3:00am?)-11:00am, expect 2:00-9:00am schedule to night;
- Don't know why old accound doesn't work any more, use new account; from 158/169 to 0/169 using Java
- Worked on the following questions: 1/169
  - divide two integers, just got the Java environment ready
  - regular expression matching: working on it!, require understanding and summarizing
