12.2 Other things

- finally got the package working now with the help from online;

- These two days, especially bad sleep. 7(8)~12:30pm last night, feeling can fall asleep now at 1:00am, hope tomorrow will be another day.

- only 5 today, Left all those slightly challenged ones for tomorrow.

13 1/2/2015, Friday

13.1 worked on 7 problems, 35/173:

- LRU Cache, need to rework on it sometime, doubly-linked list to maintain frequency not proficient;

- Insertion sort list, straight forward

- sort list, merge sort, when break it down into pieces, it's not that hard;

- evaluate reverse polish notation

- gas station

- single number

- single number II, half done, most basic, but needs the perfect method, **tomorrow**

- **Now:** I am not afraid of lists, or even trees, but still don't feel confortable with DP yet. Need some quality time on couple of questions of that type. For Graphics as well. I will not touch them when I am headache, but will work on them when I have a mind.

- **undone:** binary tree Preorder Traversal - iterative method still thinking

13.2 Other things

- When thought about sth, cannot fall asleep, fall asleep at 8:00am, and waked up at 12:00, so today would be filled with tidious things;

- The haircurt store was closed during Christmas (I went to the store most probably on 12/26 on the afternoon after I met the two who were leaving for CA on 24th, but I don't really remember. The door was closed and the note on door said they would open today), and I called today and they did, so I spent $7+$1 tip and half an hour in store got my hair cut, but still spent 1 hours at home to redo it to thin the hair layers; Cut hair has nothing to do with love life, but rather that I don't want to waste time on the hair at this semster;

- try to organize previous courses contents, get the projects done better, and upload into github, and so far keep them secret until the time I need them in case in war;

- need to work on the appointment with professor web scheduling projects, because it is important, and sure will be beaten if I fail in case in war;

- target for fall asleep at 4:00am, but target for 8-10 easier algorithms problems be done before sleep; Time is so limited, I need change my schedule and use time more efficiently.

14 1/1/2015, Thursday

14.1 worked on 8 problems, 28/173:

- intersection of wto linked list

- reverse words in string

- find Minimum in rotated sorted array

- find Minimum in rotated sorted array with Duplicates

- min stack

- linked list cycle

- linked list cycle II find start

- Reorder list

- binary tree Preorder Traversal - iterative method still thinking

15 12/31/2014, Wednesday

- java-mode autofill functions and yasnippets snippets, while keeping tab-indent block are all working now, like the emacs environment;

- worked on **9?10** problems, **19/173**:

  - Longest substring with at most 2 distinct characters, took my effort to rewrite it, sth can be done;
  - binary search tree iterator, understand theory, feels like just got Java environment ready;
  - excel sheet column number
  - factorial training zeroes
  - find peak element
  - maximum gap **dont like**
  - fraction to recurring decimal
  - excel sheet column title
  - majority element

16   12/30/2014, Tuesday

- get Emacs JDEE environment ready, can compile and run inside emacs now, convenient than using terminal jc j;

- worked on **5** problems, **9/173**:

    - binary tree upside down
    - missing ranges
    - two sum II
    - one edit distance
    - **DONT LIKE:** read n characters given read4 II

17   12/20/2014, Saturday

- Website (github), program highlight, and chinese input environment all good now;

- Will configure Linux Mint Java environment later, prefer emacs;

- 145/168 done before new season review, begin to work on these questions from today.

- Just got 4 easiest done: **149/168**

    - min stack,
    - excel sheet column title,
    - compare version number, and
    - intersection of two linked list,

18   12/21/2014, Sunday

- Only three got done today: **152/169**

    - maximum gap
    - fraction to recurring decimal
    - majority element

- Don't feel my mind is clear today at all, will look into job searing instead, hopefully tomorrow I can solve more problems, and slightly complicated ones;

19   12/22/2014, Monday

- So far got four done: **156/169**

    - sort list
    - merge k sorted list
    - trapping rain water
    - recovery binary search tree

- am going to work on the rest 6 tonight, so that hopefully tomorrow I would be able to work on the new 10 questions;

    - **word ladder II**: spent hours on this one, but got really sick with it! I should have solved my problems gradually, like solve the clone graph to understand graph first before touch this one, but I will get this one done later when I have clear mind.
    - regular expression matching
    - divide two integers
    - clone graph
    - find peak element

20   12/23/2014, Tuesday

- Meet IPO staff this morning got coming semester plans clear at 8:30am in the morning;

- Will most probably meet some friend and have dinner together; changed to be **tomorrow noon**

- Hopefully by this morning's dirruption meeting staff, I could change back my regular schedule instead of 5am-13:30 day time sleeping, target for tonight fall asleep before 12:00am; fall asleep from 10:00-15:30, seems I will change my schedule back as expected tonight~!

- Will not work on Algorithms for today, but work on it hard tomorrow. I have my confidence that I can figure them out, and do great job summarize the questions during my Java round, no worries!

- so far Got 2 done: **158/169**

    - find peak element
    - maximal rectangle

21   12/24/2014, Wednesday

- 2:00(3:00am?)-11:00am, expect 2:00-9:00am schedule tonight;

- Don't know why old accound doesn't work any more, use new account; from **158/169** to **0/169** using **Java**

- Worked on the following questions: **1/169**

    - divide two integers, just got the Java environment ready
    - regular expression matching: **working on it!**, require understanding and summarizing
